PROFILE SUMMARY

I'm an aspiring graphic designer. I have currently completed my freshman year at Atlas Skilltech University, Mumbai. As a result of the experience that I gained while I was on my freshman year, I am now aware of the important design principles and fundamentals. I know now the different tools that are used in applications like Canva, Adobe Illustrator and also Adobe Photoshop. I would like to use those skills in my work experience. Along with that, I would also like to improve those skills while gaining the experience.

SKILLS

As a result of my experience at the freshman year, I learnt filmmaking. We had a subject called time. In it we had to actually shoot a short movie. So through experience, I learnt how to compile all the scenes together, selecting the background music that relates to the whole mood in the scene and also the entire process of video editing. This project along with many more projects were done in a group. My teamwork skills improved as a result of the multiple projects.

I'm a self motivated person and also as a result of my education experience in Atlas University, I'm now habituated with completing all the assignments on time and meeting the deadline on time. This prepared me for the practical world.

Adaptable to new and challenging situations. During my freshman year, I was given many projects to work on and each of the projects was different and unique in its way. At first, it was not easy for me to adapt to the new projects but then after some time I started getting excited whenever I got more challenging projects

I tend to notice little things in everything and I believe that it is those little things that make the object or product what it is. By paying attention to little things the outcome turns out to be great. While using software like photoshop and illustrator, I tend to look at the faults in the product that I've made and find ways in which I can make it better. I tend to learn from my mistakes.

Good at ideating things first before making the final product. I always believe that we should not start making the final project without making any draft or prototype. I always believe in first making the draft prototype physically and afterward the final design or product.

Good at making decisions. I always believe that making better decisions is a significant part of work.

BELIEF SYSTEM

I'm always ready to learn and grow. I'm always ready to accept my mistakes and faults and learn from them. My core belief system is and will always be to learn from my past and present experiences. I'm always ready to hone my skills and grow into a better person. I'm always ready to put the clients need before my own.

EDUCATION

2008-01 – 2019-07 **10TH Grade: Science**

Hiranandani Foundation School, Thane (W)-In -Wood Street

Gained experience in several subjects like English, History, Geography, Environmental Science. I had chosen arts and science in my electives. ART as a subject also helped me grow in traditional art which I think plays an important part in GRAPHIC DESIGN too.

2019-08 – 2021-03 **11-12TH Grade: Commercial Studies**

Vasant Vihar Jr. College-Mumbai

I got a great overview in the world of business and also commerce through this course. I got to know how things work in the practical world and the importance of actually learning how the economy works in a particular place.

2021-06 – Current **Bachelors in Design: Communication Design**

Atlas Skilltech University, Mumbai - Equinox Business Park, Ambedkar Nagar, Kurla West

I have completed my first year in design. As a result of this experience I gained many skills like communication skills, time management skills and also the importance of appreciating others point of view in certain subjects. I learnt things that are very important and can be put to use in the practical world.

INTERESTS

I like to research about fascinating products, and also am well verse with the handling of social media handles.

Learning about business and e-commerce interests me.

Animation, graphics in advertisements, animated movies posters, the different type of fonts in different softwares interests me a lot.

Analysing things and furthermore deconstructing it to understand the usage of it and also the functions of it interests me.
